

CBO Projections: Senate Health-Care Bill's Total Costs

True first-10-year total costs:
\$2.5 Trillion

What the Democrats *call* the "first 10 years" (2010-2019)

The *true* first 10 years (2014-2023)

Percentage of "10 year" costs that hit in the first 4 years: **4%**

All numbers are from the CBO. Chart was produced by Jeffrey H. Anderson, Senior Fellow, Pacific Research Institute. An earlier version of this chart showed costs based on the figures for "expansions in insurance coverage," which the Democrats are using (from 2010-19) in claiming \$848 billion in costs. But there are also many additional costs in the bill, as the CBO notes and as this chart reflects.
